

Andrew Attilio

Flagstaff, AZ — attilio.andrew@gmail.com — (423) 427-8012 — www.andrewattilio.com

EDUCATION

Northern Arizona University, Flagstaff, AZ
B.S. Mathematics
Minor: Computer Science

Expected Graduation: May 2025

EXPERIENCE

Content Manager | Copywriter | Web Dev
Self-Employed

Flagstaff, Arizona
Aug 2020 - Present

- I operate my own freelance business. I offer a variety of services, including content management, web development, writing, editing, and SEO.
- I am 'Top-Rated Plus' on UpWork with 100% Job Success. View my profile to see client feedback and other information.
- I work with clients and oversee my employees using a variety of remote work technologies.

Restaurant & Community Manager
Hana Farms

Hana, Hawaii
Feb 2022 – Oct 2022

- Operated all aspects of a wood-fired pizza restaurant in an international tourist destination (Maui, Hawai'i), including ordering, scheduling, inventory, food prep, recipe creation, etc.
- Prepared healthy, well-balanced meals for the farm community of ~ 20 residents/workers.
- Worked closely with our Farm, Bakery, and Marketplace managers to run a lucrative, multi-faceted business on the famous Road to Hana. Settled interpersonal disputes between community members.

Resort Manager
Water's Edge Resort

Garden City, Utah
Jan 2019 – Jan 2020

- Managed all aspects of a full-service restaurant that served breakfast, lunch, and dinner on the road to Yellowstone and Grand Tetons National Parks. Additionally, I managed the luxury condos and boutique hotel that were connected to the restaurant.

PROJECTS

The Game of Life

Project Link: https://github.com/atiumcache/game_of_life/

- A simple terminal-based implementation of John Conway's Game of Life. A classic example of cellular automata, mathematical modeling, and artificial life.

eReader Simulation

Project Link: <https://github.com/atiumcache/ereader/>

- A simple representation of an eBook reader that works with Project Gutenberg. The program allows the user to simulate viewing a bookstore, 'purchasing' books, and reading them on Project Gutenberg.

Flavor Pairings Web App

Project Link: <https://github.com/atiumcache/flavor-pairings-website>

- Provides flavor pairing advice based on a user's inputted ingredient.
- Utilizes Python, Flask, HTML, and CSS. The program takes in a large collection of food data, cleans and organizes it, and provides the user with accurate, well-formatted recommendations.

SKILLS

- **Programming:** Python | C | Java | HTML | CSS | Git | Flask | Hugo
- **Communication:** I have lived and worked in close community with people from all over the world through my diverse employment experiences and participation as a Couchsurfing Host and a Workaway Volunteer. I emphasize clear, effective communication in all aspects of my life.
- **Leadership:** I have extensive management experience and take pride in my leadership skills. Over the years, I have adopted a *lead by example* attitude.
- **Other:** Guitar | Piano | Cooking | Hiking | Fitness
